

Moamen Moustafa Basyoni

.NET Software Development Specialist | Backend & Distributed Systems

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com GitHub: github.com/moamen270

PROFESSIONAL SUMMARY

.NET software engineer with around three years designing and building backend applications on ASP.NET Core and modern .NET (8/9/10), applying SOLID principles, design patterns, and Clean Architecture across a large enterprise codebase — with measurable engineering impact: a runtime business-rule engine that improved rule-execution performance by 45%, an API gateway that cut deployment downtime from two hours to fifteen minutes, and an OpenID Connect / OAuth2 identity server. Strong in C#, RESTful API design, Entity Framework Core over SQL Server, and microservices, with Docker and CI/CD in Azure DevOps. Comfortable across the stack with JavaScript and TypeScript, and working proficiency in Angular. Works in Agile / Scrum teams and uses AI-assisted development in daily delivery.

PROFESSIONAL EXPERIENCE

.NET Software Engineer — Andalusia Health Business Solution (AHBS)

Dec 2023 – Present · Alexandria, Egypt

- Design, develop, and maintain backend applications for the Andalusia hospital group (Egypt and Saudi Arabia) using ASP.NET Core and modern .NET, applying SOLID principles, design patterns, and Clean Architecture across 5 core and 7+ additional modules.
- Build and maintain RESTful APIs and web services for distributed, service-based hospital modules, and design efficient data access layers with Entity Framework Core over SQL Server and PostgreSQL.
- Modernized legacy modules from .NET Framework 4.5 / ASP.NET Core 2.2 toward a modern, layered .NET architecture, extending and refactoring a large, mature codebase.
- Built a runtime Business Rule Engine for injected business logic, improving rule-execution performance by 45% (measured with BenchmarkDotNet).
- Implemented an API Gateway with health-aware load balancing and parallel service versioning, cutting deployment downtime from 2 hours to 15 minutes.
- Delivered CI/CD pipelines in Azure DevOps with multi-repository Git Flow and Docker across Dev, Staging, and Pre-Live environments, working in an Agile / Scrum team.
- Implemented OpenID Connect / OAuth2 authentication and scope- and claim-based authorization for internal services.

Backend Engineer — Trastain

Feb 2025 – Aug 2025 · Cairo, Egypt (Remote) · Part-time · PropTech marketplace

- Built a PropTech marketplace backend from scratch, including shared-property booking, policy enforcement, and preference matching.
- Integrated Stripe and Paymob payment gateways with webhook processing and HMAC signature verification.
- Automated build and deployment with GitHub Actions CI/CD to Azure Web Apps and Azure Static Web Apps.

Software Engineer — MYM (Make Your Miracle)

Jun 2023 – Oct 2023 · Giza, Egypt · SaaS / e-commerce / booking

- Developed backend systems for e-commerce and booking platforms end-to-end, from requirements analysis through implementation, deployment, and support.
- Integrated payment gateways (Stripe, Paymob) with webhook handling; deployed to Azure App Service.

TECHNICAL SKILLS

- Languages:** C#, SQL, JavaScript, TypeScript, Python
- .NET & Backend:** ASP.NET Core, ASP.NET Core MVC, Minimal APIs, .NET 8/9/10, .NET Framework 4.5, Entity Framework Core, REST APIs, gRPC, Webhooks
- Architecture & Practices:** SOLID, Design Patterns, Clean Architecture, Microservices, Service-Oriented Architecture, Agile / Scrum
- Front-end:** JavaScript, TypeScript, Angular (working proficiency), jQuery, Ajax, HTML5, CSS3
- Databases:** SQL Server, PostgreSQL
- Identity & Security:** OpenID Connect (OIDC), OAuth2, JSON Web Tokens (JWT), scope- and claim-based authorization
- DevOps & Version Control:** Docker, Azure DevOps (CI/CD pipelines), GitHub Actions, Git, Git Flow
- Messaging & Distributed Systems:** RabbitMQ, Temporal, Consul, event-driven architecture
- Testing & Performance:** automated / unit testing, BenchmarkDotNet, performance tuning
- AI-Assisted Development:** Claude Code, GitHub Copilot, Model Context Protocol (MCP)

EDUCATION

B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt · 2023 Grade: B+ · GPA 3.2 / 4.0

PUBLICATION & LANGUAGES

- IoT-Enabled E-Prescription Management and Dispensing Machine Monitoring* — IEEE, 2024
- Arabic (Native) · English (B2, Upper Intermediate)
