PROFESSIONAL SUMMARY

.NET developer with around three years building enterprise backend systems in **C#, ASP.NET Core, MVC and Web API**, applying **DDD-aligned Clean Architecture** and **SOLID** over SQL Server (T-SQL). Ships event-driven, distributed backends — Temporal Saga orchestration, **RabbitMQ**, and an identity/API-gateway layer — in an Agile team with Git-based CI/CD and unit testing as standard practice. Also directed a legacy-to-modern **Angular** migration at the architecture level.

PROFESSIONAL EXPERIENCE

R&D Engineer — .NET Backend Development · Andalusia Health Business Solution (AHBS)

Dec 2023 – Present · Alexandria, Egypt

- Build and maintain enterprise applications in **C#, ASP.NET Core (MVC and Minimal APIs) and Web API**, applying **SOLID principles** and **Clean Architecture** (domain-driven boundaries) over **SQL Server** (T-SQL) and PostgreSQL via Entity Framework Core.
- Replaced a legacy MS DTC distributed-transaction workaround with **Temporal Saga orchestration** and **RabbitMQ** event-driven messaging, improving 10+ inter-service interaction patterns.
- Designed and built an **identity/authentication server** (OpenIddict, JWT, OAuth2/OIDC), **Consul**-based service discovery, and an **Nginx API gateway** with parallel service versioning — cutting deployment downtime from 2 hours to 15 minutes.
- Built a runtime Business Rule Engine for injected business logic, improving execution performance by **60%**, verified with **BenchmarkDotNet** (xUnit for functional coverage).
- Modernized **5 core + 7 additional modules** off legacy .NET Framework 4.5 / ASP.NET Core 2.2.
- **Git-based CI/CD**: migrated source control from a TFVC monolith to Azure DevOps Git multi-repo, with pipelines across Dev, Staging and Pre-Live; conduct technical code reviews as a standard part of the role.
- **Defined and directed** the migration from a monolithic Vue 3 shell with iframed AngularJS to a modern **Angular** shell architecture on PrimeNG — set the target architecture and oversaw delivery, working with the team rather than coding it solo.
- Mentored engineers through an 8-session onboarding programme reaching 25 engineers across 6 teams.

Software Engineer — MYM (Make Your Miracle)

Jun 2023 – Oct 2023 · Giza, Egypt · Software house — e-commerce & booking
