

Moamen Moustafa Basyoni

Backend Developer | .NET Core, Distributed Systems & Identity

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com GitHub: github.com/moamen270

PROFESSIONAL SUMMARY

Backend engineer building production .NET Core services around exactly the problem set this role describes: microservices, event-driven communication, and authentication/authorization infrastructure. Designed and built an OIDC/OAuth2 identity server on OpenIddict with JWT access/refresh tokens — the same identity stack named in this posting — plus RabbitMQ-based event-driven communication and a Temporal Saga replacement for a legacy distributed-transaction design. Roughly three years of production experience against the six asked for here; the scope of that work is what I'd ask to be judged on.

PROFESSIONAL EXPERIENCE

R&D Engineer — Backend, Distributed Systems & AI Engineering

Andalusia Health Business Solution (AHBS) · Alexandria, Egypt · Dec 2023 – Present

- Designed and built an **identity/authentication server** using **OpenIddict**, issuing **JWT access and refresh tokens** with scope-based and claim-based authorization — the same identity technology named in this role's stack.
- Implemented **event-driven communication with RabbitMQ**, and replaced a legacy MS DTC distributed-transaction workaround with **Temporal Saga orchestration**, improving 10+ inter-service interaction patterns.
- Built and maintain services in **C#, ASP.NET Core (.NET 8/9/10)** with **Entity Framework Core** over **SQL Server** and PostgreSQL, applying **Clean Architecture** and SOLID principles.
- Built a **Consul**-based service discovery layer and an **Nginx API gateway** with parallel service versioning, cutting deployment downtime from 2 hours to 15 minutes (87.5%).
- Optimized a runtime business-rule engine to a **60%** performance improvement, measured with BenchmarkDotNet — direct evidence of high-throughput service tuning.
- Modernized 5 core + 7 additional modules off legacy .NET Framework 4.5, working inside a large, mature distributed codebase.
- Migrated source control from a TFVC monolith to Azure DevOps Git multi-repo; established CI/CD pipelines across Dev, Staging and Pre-Live.

Technical Partner (equity) — Trastain

Cairo, Egypt (Remote) · Feb 2025 – Aug 2025

- Built a booking platform from scratch, including transaction security work for booking execution and payment webhook processing with HMAC signature verification.

Software Engineer — MYM (Make Your Miracle)

Giza, Egypt · Jun 2023 – Oct 2023

- Built backend systems for e-commerce and booking platforms, delivered end to end.

TECHNICAL SKILLS

- Languages:** C#, Python, SQL, TypeScript, JavaScript
- .NET / Backend:** C#, .NET Core, .NET 8/9/10, ASP.NET Core, Entity Framework Core, gRPC, REST APIs
- Databases:** SQL Server, PostgreSQL
- Distributed Systems & Messaging:** Temporal (Saga orchestration), **RabbitMQ** (event-driven / pub-sub), gRPC, MassTransit
- Identity & Security:** **OpenIddict**, **JWT** (access/refresh tokens), OAuth2, OpenID Connect, scope- and claim-based authorization
- Architecture:** Clean Architecture, Microservices, Distributed Systems, SOLID, Business Rule Engines
- Service Discovery & Gateway:** Consul, Nginx API Gateway, dynamic routing, load balancing
- Performance:** BenchmarkDotNet, high-throughput service tuning, async/await concurrency
- DevOps & Version Control:** Git, Azure DevOps Pipelines, GitHub Actions, CI/CD automation, Docker
- Cloud:** Azure (App Service, Blob Storage, SQL, DevOps), AWS (EC2, S3)
- AI-Assisted Development:** Claude Code, GitHub Copilot

EDUCATION

B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt · 2023 Grade: B+ · GPA 3.2 / 4.0

PUBLICATION & LANGUAGES

- IoT-Enabled E-Prescription Management and Dispensing Machine Monitoring* — IEEE, 2024
- Arabic (Native) · English (B2, Upper Intermediate)
