

Moamen Moustafa Basyoni

Backend Engineer | .NET, Healthcare Systems & Technical Leadership

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com GitHub: github.com/moamen270

PROFESSIONAL SUMMARY

I already build and modernize the backend systems powering the Andalusia hospital group across Egypt and Saudi Arabia — I'm currently an engineer at AHBS, the group's technology partner, and this Team Lead role would formalize leadership work I'm already doing informally: architecting the platform's modernization, mentoring across teams, and reviewing code as a matter of course. Roughly three years in, with a two-part mandate that's unusually broad for that tenure — building AI tooling across the SDLC, and analyzing, modernizing, and maintaining the core platform alongside the architect. Strong OOP and clean-code discipline in .NET Core and ASP.NET MVC, SOLID principles, unit testing, and Git-based CI/CD as daily practice, not theory.

PROFESSIONAL EXPERIENCE

R&D Engineer — Backend, Distributed Systems & AI Engineering

Andalusia Health Business Solution (AHBS) · Alexandria, Egypt · Dec 2023 – Present *Technology partner to the Andalusia hospital group — HMIS serving hospitals in Egypt and Saudi Arabia*

Leadership and mentoring — the part of this role a title hasn't caught up with yet

- Completed AHBS's own internal **"Leadership in Action"** program (June 2026) — a formal leadership credential from this exact employer, earned recently, on top of the leadership work documented below.
- Designed and ran a **25-engineer, 6-team, 8-session onboarding program** on architecture and AI-assisted development — the closest thing to formal team leadership available without the title.
- **Conduct technical code reviews** as a standard part of the role, and mentor engineers on modernization practices.
- **Defined and directed** the migration from a monolithic Vue 3 shell with iframed AngularJS to a modern Angular shell architecture — set the target architecture and oversaw delivery, working with the team rather than coding it solo.
- Work directly with the platform architect to **analyze, plan, and implement** the system modernization roadmap, then support the development team through implementation, review, and deployment as a senior developer.

Backend engineering — the day-to-day

- Build and maintain enterprise applications in **C#, ASP.NET Core (MVC and Minimal APIs)**, and .NET 8/9/10, applying **SOLID principles** and **Clean Architecture**, with **Entity Framework Core** over **SQL Server** and PostgreSQL.
- Replaced a legacy MS DTC distributed-transaction workaround — which had forced the entire platform onto a single shared database — with **Temporal Saga orchestration**, improving 10+ inter-service interaction patterns.
- Designed and built an **identity/authentication server** (OpenIddict, JWT, OAuth2/OIDC), **Consul**-based service discovery, and an **Nginx API gateway** with parallel service versioning that cut deployment downtime from 2 hours to 15 minutes (87.5%).
- Modernized **5 core + 7 additional modules** off legacy .NET Framework 4.5, working inside a large, mature **healthcare** codebase — Blood Bank, Supply Chain, Bed Management, Hospital Structure — including AABB-aligned transfusion workflows at **98% compliance**.
- **Git-based CI/CD**: migrated source control from a TFVC monolith to Azure DevOps Git multi-repo, and established pipelines across Dev, Staging, and Pre-Live.
- Work across both **Azure** and AWS.
- Built AI tooling across the SDLC — including an automated PR review system that checks implementations against linked requirements, which is, in effect, continuous code-review infrastructure applied at scale.

Technical Partner (equity) — Trastain

Cairo, Egypt (Remote) · Feb 2025 – Aug 2025

- Built a booking platform from scratch as technical partner on equity, including RAG-based matching and multimodal AI search.

Software Engineer — MYM (Make Your Miracle)

Giza, Egypt · Jun 2023 – Oct 2023

- Built backend systems for e-commerce and booking platforms, delivered end to end.

TECHNICAL SKILLS

- **Languages**: C#, Python, SQL, TypeScript, JavaScript
- **.NET / Backend**: C#, .NET Core, .NET 8/9/10, .NET Framework 4.5, **ASP.NET MVC**, ASP.NET Core Minimal APIs, Entity Framework Core, REST APIs
- **Practices**: **SOLID principles**, Clean Architecture, **unit testing** (xUnit, BenchmarkDotNet), code review, requirements analysis
- **Databases**: SQL Server, PostgreSQL (relational, with ORM via Entity Framework Core)
- **Version Control & CI/CD**: Git, Git Flow, Azure DevOps Pipelines, GitHub Actions, CI/CD automation, Docker
- **Cloud**: **Azure** (App Service, Blob Storage, SQL, Static Web Apps, DevOps), AWS (EC2, S3)
- **Architecture**: **Microservices**, Distributed Systems, Service-Oriented Architecture, Temporal Saga orchestration, RabbitMQ, API Gateway, Consul service discovery
- **Identity & Security**: OpenID Connect, OAuth2, OpenIddict, JWT, scope/claim-based authorization
- **Domain**: **Healthcare / HMIS** — Blood Bank, Supply Chain, Bed Management, Hospital Structure, AABB compliance
- **Leadership & Enablement**: Cross-team onboarding (25 engineers, 6 teams, 8 sessions), technical direction of a major frontend migration, mentoring, code review
- **AI-Assisted Development**: Claude Code (daily), GitHub Copilot

EDUCATION

B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt · 2023 Grade: B+ · GPA 3.2 / 4.0

PUBLICATION & LANGUAGES

- *IoT-Enabled E-Prescription Management and Dispensing Machine Monitoring* — IEEE, 2024
- Arabic (Native) · English (B2, Upper Intermediate)
