

Moamen Moustafa Basyoni

Backend Software Developer | C#, .NET Core & Layered Architecture

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com GitHub: github.com/moamen270

PROFESSIONAL SUMMARY

Backend developer with around three years on C# and .NET, working across both a large legacy .NET Framework estate and modern .NET Core services. Builds with layered and Onion-style architecture, CQRS and the Repository pattern, with Entity Framework Core over SQL Server. Experienced at extending and refactoring mature codebases — modernized 5 core and 7+ additional modules from .NET Framework 4.5 and ASP.NET Core 2.2 — as well as building new services and the distributed infrastructure around them.

PROFESSIONAL EXPERIENCE

R&D Engineer — Backend Development · Andalusia Health Business Solution (AHBS)

Dec 2023 – Present · Alexandria, Egypt

- Build backend services on **C#, ASP.NET Core and .NET 8/9/10** for the Andalusia hospital group across Egypt and Saudi Arabia, applying **Clean/Onion architecture, CQRS, Repository and Dependency Injection patterns** with SOLID.
- Design data access with **Entity Framework Core and LINQ over SQL Server** and PostgreSQL.
- Work extensively inside a **large, mature legacy codebase** — modernized 5 core and 7+ additional modules from **.NET Framework 4.5 / ASP.NET Core 2.2** to modern .NET, replacing a legacy MS DTC distributed-transaction design with Temporal Saga orchestration.
- Design and develop **REST and gRPC APIs**, authoring contracts before implementation; improved 10+ inter-service interaction patterns.
- Built a runtime Business Rule Engine for injected business logic, improving rule-execution performance by **45%** (BenchmarkDotNet).
- Implemented an **OpenID Connect / OAuth2 identity server** (OpenIddict) with JWT and scope- and claim-based authorization.
- Built distributed infrastructure — RabbitMQ event-driven messaging, Consul service discovery, and an Nginx API gateway with health-aware load balancing that cut deployment downtime from 2 hours to 15 minutes.
- Implement front-end behaviour with **JavaScript**, jQuery and Ajax; host on IIS.
- Deliver CI/CD pipelines in Azure DevOps with Docker; migrated source control from a legacy TFS/TFVC monolith to Azure DevOps Git multi-repo with a private NuGet feed.
- Conduct technical code reviews and mentored 25 engineers across 6 teams through an 8-session onboarding programme.

Technical Partner (equity) — Trastain

Feb 2025 – Aug 2025 · Cairo, Egypt (Remote) · Part-time · PropTech

- Built a short-term rental booking platform from scratch, including transaction security for booking execution.
- Integrated Stripe and Paymob with webhook processing and HMAC signature verification.

Software Engineer — MYM (Make Your Miracle)

Jun 2023 – Oct 2023 · Giza, Egypt · Software house

- Backend systems for e-commerce and booking platforms, delivered end to end from requirements through deployment and support.

TECHNICAL SKILLS

- **Languages:** C#, SQL, JavaScript, TypeScript, Python
- **.NET:** ASP.NET Core, ASP.NET Core MVC, Web API, Minimal APIs, .NET 8/9/10, .NET Framework 4.5, Entity Framework Core, LINQ
- **Architecture:** Onion / layered / N-Tier, Clean Architecture, **CQRS**, Repository, Dependency Injection, SOLID, design patterns, microservices, event-driven architecture
- **Databases:** SQL Server, PostgreSQL, Neo4j
- **Distributed Systems:** Temporal (Saga), RabbitMQ, MassTransit, Consul, API gateway, REST, gRPC
- **Security:** OpenID Connect (OIDC), OAuth2, OpenIddict, JWT, scope- and claim-based authorization
- **Web / Front-end:** JavaScript, TypeScript, jQuery, Ajax, HTML, CSS, XML; Angular (working knowledge — directed a migration to it)
- **DevOps & Hosting:** Azure DevOps CI/CD, GitHub Actions, Docker, Git, TFS/TFVC, IIS, Azure, AWS
- **Testing & Performance:** xUnit, pytest, BenchmarkDotNet, performance tuning

EDUCATION

B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt · 2023 Grade: B+ · GPA 3.2 / 4.0

PUBLICATION & LANGUAGES

- *IoT-Enabled E-Prescription Management and Dispensing Machine Monitoring* — IEEE, 2024
- Arabic (Native) · English (B2, Upper Intermediate)
