

# Moamen Moustafa Basyoni

Senior Backend Engineer | .NET Microservices

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com

GitHub: github.com/moamen270

## Professional Summary

Senior Backend Engineer with around three years building and modernizing .NET microservices for healthcare platforms. Owned identity and authentication infrastructure (OpenID Connect, OAuth2, JWT) and led legacy refactoring toward a Clean Architecture layout, reducing oversized components and paying down technical debt. Strong in ASP.NET Core and Minimal APIs, Entity Framework Core and SQL Server, event-driven microservices, Docker, and CI/CD with GitHub Actions.

## Professional Experience

### Senior Backend Engineer (.NET) — Andalusia Health Business Solution (AHBS)

Dec 2023 – Present

Alexandria, Egypt

- Built and maintained .NET microservices for the Andalusia hospital group's **Hospital Management (HMIS)** platform across **Egypt and Saudi Arabia** (Blood Bank, Supply Chain, Bed Management).
- Owned the design and development of an identity / authentication server** for hospital systems — **OpenID Connect, OAuth2, OpenIdDict, JWT** access and refresh tokens, and **scope- and claim-based authorization** across 10+ services.
- Led a **refactoring effort** on existing healthcare services — **reducing oversized classes**, improving separation of concerns within a **Clean Architecture** layout, and modernizing .NET Framework 4.5 / ASP.NET Core 2.2 code across 5 core and 7+ additional modules.
- Designed and evolved **Entity Framework Core** data models over **SQL Server** — schema design and migrations — and exposed them through **ASP.NET Core Minimal APIs** and REST endpoints for Blood Bank, Supply Chain, and Bed Management modules.
- Built **event-driven inter-service communication** with **RabbitMQ** and distributed transaction workflows with **Temporal** Saga orchestration.
- Grew **automated unit and integration test coverage** (pytest) and strengthened **CI/CD pipelines** with **Docker** across Dev, Staging, and Pre-Live — cutting deployment downtime from 2 hours to 15 minutes.
- Applied **application-security practices**: personally identifiable information (PII) masking, prompt-injection mitigation and guardrails for AI services, rate limiting, and token budgeting.

### Backend Engineer — Trastain

Feb 2025 – Aug 2025

Cairo, Egypt (Remote) · Part-time · Real-estate technology (PropTech) marketplace

- Built a PropTech marketplace backend from scratch — shared-property booking, policy enforcement, and preference matching — with inter-service APIs and transaction security for booking execution.
- Integrated **Stripe and Paymob** payment gateways with **webhook processing and HMAC signature verification** for booking transactions.
- Built **GitHub Actions** CI/CD workflows for automated build and deployment to Azure Web Apps and Azure Static Web Apps across Dev and Staging environments.

### Software Engineer — MYM (Make Your Miracle)

Jun 2023 – Oct 2023

Giza, Egypt · SaaS / e-commerce / booking

- Developed backend systems for e-commerce and booking platforms end-to-end, including **Stripe and Paymob** payment integration with webhook handling, and GitHub Actions CI/CD to Azure Web Apps and Azure Static Web Apps.

## Technical Skills

**Languages:** C#, SQL, Python, JavaScript, TypeScript

**.NET & Backend:** .NET 8/9/10, ASP.NET Core, Minimal APIs, Entity Framework Core, REST APIs, gRPC, .NET Aspire

**Architecture:** Clean Architecture, Microservices, Distributed Systems, Service-Oriented Architecture, Saga orchestration, API Gateway

**Identity & Security:** OpenID Connect, OAuth2, OpenIdDict, JWT, access & refresh tokens, scope- and claim-based authorization, PII masking, rate limiting

**Messaging & Data:** RabbitMQ, Temporal, Consul, Nginx, event-driven architecture; SQL Server, PostgreSQL, Neo4j (schema design, migrations)

**DevOps & Cloud:** GitHub Actions, Azure DevOps CI/CD, Docker, Git / Git Flow, multi-repository CI/CD, Azure Web Apps, Azure Static Web Apps

**Testing & Integrations:** Automated unit & integration testing (pytest); payment gateways (Stripe, Paymob), webhooks, HMAC signature verification

**Domain:** Healthcare / HMIS, regulated workflows (AABB)

## Education

### B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt

2023

Grade: B+ · GPA 3.2 / 4.0

**Languages:** Arabic (Native) · English (B2, Upper Intermediate)
