

Moamen Moustafa Basyoni

.NET Developer | Legacy Modernization & AI-Assisted Development

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com GitHub: github.com/moamen270

PROFESSIONAL SUMMARY

.NET engineer with roughly three years of experience whose core work is modernizing and optimizing legacy applications — exactly the mandate this role describes. Currently migrating a platform off .NET Framework 4.5 toward modern .NET, replacing a legacy distributed-transaction design, and decomposing a monolithic codebase into Git multi-repo delivery. Comfortable across both current .NET (8/9/10) and older Framework versions, with hands-on Docker, AWS, and daily use of AI-assisted development tools (Claude Code) — a direct match for the role’s interest in Copilot/Cursor/Claude-style workflows.

PROFESSIONAL EXPERIENCE

R&D Engineer — Backend, Distributed Systems & AI Engineering

Andalusia Health Business Solution (AHBS) · Alexandria, Egypt · Dec 2023 – Present

- **Modernized and optimized legacy applications:** migrated 5 core + 7 additional modules off **.NET Framework 4.5** / ASP.NET Core 2.2 toward modern **.NET 8/9/10**, including performance tuning and refactoring under Clean Architecture.
- Replaced a legacy MS DTC distributed-transaction workaround with **Temporal Saga orchestration**, and built an API gateway (Nginx) with parallel service versioning that cut deployment downtime from 2 hours to 15 minutes (87.5%).
- Built and maintain **C#, ASP.NET Core (MVC and Minimal APIs), Web APIs**, and TypeScript-based frontend behavior over **Entity Framework Core** and SQL Server/PostgreSQL.
- Built a runtime business-rule engine improving execution performance by **45%** (BenchmarkDotNet) — direct performance-tuning evidence.
- Work daily with **Docker**, Git, and Azure DevOps CI/CD pipelines across Dev, Staging, and Pre-Live.
- Use **Claude Code daily** for AI-assisted development, plus GitHub Copilot — practical, hands-on familiarity with AI coding tools, not just awareness of them.
- Conduct technical code reviews and mentor engineers on modernization practices.

Technical Partner (equity) — Trastain

Cairo, Egypt (Remote) · Feb 2025 – Aug 2025

- Built a booking platform from scratch; deployed to **AWS**-adjacent and Azure infrastructure with GitHub Actions CI/CD.

Software Engineer — MYM (Make Your Miracle)

Giza, Egypt · Jun 2023 – Oct 2023

- Built backend systems for e-commerce and booking platforms, delivered end to end.

Freelance / Independent Client Work

- Evaluated and delivered on both **Azure and AWS** (EC2/S3) depending on project needs, including a cost-driven migration off a cloud SMS provider.
- Built GitHub Actions CI/CD pipelines for automated build and deployment.

TECHNICAL SKILLS

- **Languages:** C#, Python, SQL, TypeScript, JavaScript
- **.NET / Backend:** C#, **.NET 8/9/10**, **.NET Framework 4.5** (comparable legacy-modernization experience to .NET Framework 4.8), ASP.NET Core, ASP.NET Core MVC, Minimal APIs, Web APIs, Entity Framework Core
- **Legacy Modernization:** .NET Framework → modern .NET migration, performance tuning, refactoring, Clean Architecture — 5 core + 7 additional modules modernized
- **Databases:** SQL Server, PostgreSQL (relational)
- **Cloud:** AWS (EC2, S3, messaging), Azure (App Service, Blob Storage, SQL, DevOps)
- **DevOps & Tooling:** Docker, Git, GitHub, Azure DevOps Pipelines, GitHub Actions, CI/CD automation
- **AI-Assisted Development:** Claude Code (daily), GitHub Copilot, Codex, OpenCode
- **Testing & Performance:** xUnit, BenchmarkDotNet, pytest
- **Web/Frontend:** TypeScript, JavaScript, jQuery, Ajax, HTML, CSS

EDUCATION

B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt · 2023 Grade: B+ · GPA 3.2 / 4.0

PUBLICATION & LANGUAGES

- *IoT-Enabled E-Prescription Management and Dispensing Machine Monitoring* — IEEE, 2024
- Arabic (Native) · English (B2, Upper Intermediate)
