

Moamen Moustafa Basyoni

Backend Developer | .NET, Distributed Systems & Cloud

Alexandria, Egypt · +20 102 786 8067 · mmoamen270@gmail.com GitHub: github.com/moamen270

PROFESSIONAL SUMMARY

Backend .NET engineer with roughly three years of production experience building and modernizing RESTful services, distributed systems, and enterprise database applications in C#, ASP.NET Core, and SQL Server. Works comfortably across both Azure and AWS, with hands-on Docker and CI/CD delivery. Currently modernizing a large healthcare platform: replacing a legacy distributed-transaction design with Temporal Saga orchestration, decomposing a TFVC monolith into Git microservices repositories, and building the identity, API gateway, and service-discovery infrastructure around it. Comfortable relocating for the right role.

PROFESSIONAL EXPERIENCE

R&D Engineer — Backend, Distributed Systems & AI Engineering

Andalusia Health Business Solution (AHBS) · Alexandria, Egypt · Dec 2023 – Present

- Build and maintain server-rendered and API-driven applications with **ASP.NET Core** (MVC and Minimal APIs) and **Entity Framework Core** over **SQL Server** and PostgreSQL, following **Clean Architecture**.
- Modernized **5 core + 7 additional modules** off legacy .NET Framework 4.5 / ASP.NET Core 2.2, and replaced a custom MS DTC distributed-transaction workaround — which had forced the whole platform onto one shared database — with **Temporal Saga orchestration**, improving 10+ inter-service interaction patterns.
- Designed and built distributed-systems infrastructure: an **OIDC/OAuth2 identity server** (OpenIddict, JWT, scope/claim-based authorization), **Consul**-based service discovery and dynamic routing, and an **Nginx API gateway** with parallel service versioning that cut deployment downtime from 2 hours to 15 minutes (87.5%).
- Migrated source control from a legacy TFVC monolith to **Azure DevOps Git multi-repository** delivery with a private NuGet feed, breaking project-level coupling across services.
- Built a runtime **business-rule engine**, improving execution performance by 45% (measured with BenchmarkDotNet).
- Established **CI/CD pipelines** on Azure DevOps across Dev, Staging and Pre-Live environments; work daily with **Git** and **Docker**.
- Conduct technical code reviews and mentor engineers on architecture and modernization practices.

Technical Partner (equity) — Trastain

Cairo, Egypt (Remote) · Feb 2025 – Aug 2025

- Built a booking platform from scratch on C#/.NET, including secure payment transaction handling (Stripe, Paymob) with webhook processing and HMAC signature verification.
- Deployed to **Azure Web Apps** and **Azure Static Web Apps** via GitHub Actions CI/CD.

Software Engineer — MYM (Make Your Miracle)

Giza, Egypt · Jun 2023 – Oct 2023

- Built backend systems for e-commerce and booking platforms, delivered end to end from requirements through deployment and support.

Freelance / Independent Client Work

- Evaluated **Azure vs. AWS** per project and delivered on both: Azure managed services (App Service, Blob Storage, managed SQL, Static Web Apps) for fast MVP delivery, and **AWS EC2/S3** self-managed infrastructure for later projects, including a cost-driven migration off a cloud SMS provider.
- Built GitHub Actions CI/CD pipelines and integrated Stripe/Paymob payments with webhook/HMAC verification.

TECHNICAL SKILLS

- **Languages:** C#, Python, SQL, TypeScript, JavaScript
- **.NET / Backend:** ASP.NET Core, ASP.NET Core MVC, Minimal APIs, .NET 8/9/10, .NET Framework 4.5, Entity Framework Core, REST APIs, gRPC, Webhooks
- **Databases:** Microsoft SQL Server, PostgreSQL
- **Architecture:** Clean Architecture, Microservices, Service-Oriented Architecture, Distributed Systems, Business Rule Engines, API Gateway Architecture
- **Distributed Systems & Messaging:** Temporal (Saga orchestration), RabbitMQ, MassTransit, gRPC
- **Identity & Security:** OpenID Connect, OAuth2, OpenIddict, JWT, scope- and claim-based authorization
- **Service Discovery:** Consul (service discovery, health checks, Consul Template, Consul KV)
- **Cloud:** **Azure** (App Service, Blob Storage, SQL, Static Web Apps, DevOps) and **AWS** (EC2, S3, messaging) — evaluated and delivered on both
- **DevOps & Version Control:** Git, Git Flow, **Docker**, Azure DevOps Pipelines, GitHub Actions, CI/CD automation, TFVC → Git migration
- **Performance:** BenchmarkDotNet, performance tuning, legacy system modernization
- **AI-Assisted Development:** Claude Code, GitHub Copilot

EDUCATION

B.Sc. Computer Engineering — Behera Higher Institute (BHI), Alexandria, Egypt · 2023 Grade: B+ · GPA 3.2 / 4.0

PUBLICATION & LANGUAGES

- *IoT-Enabled E-Prescription Management and Dispensing Machine Monitoring* — IEEE, 2024

- Arabic (Native) · English (B2, Upper Intermediate)
